

Medication Therapy Management Program and Drug Utilization Management

Molina Medicare offers medication therapy management programs for members who meet specific criteria. This is not part of your benefit structure, but rather a program to help you understand what your medications are doing for you and to help you take control over your medications. The program consists of a telephone conversation with a pharmacist about your medications.

The following criteria are used to identify eligible participants in the medication therapy management program:

Member must have two or more of the following chronic conditions: Diabetes Mellitus, Hypertension, Heart Failure, Hyperlipidemia, Respiratory Disease - Chronic Obstructive Pulmonary Disease (COPD), Respiratory Disease –Asthma, Mental Health - Depression, Mental Health - Schizophrenia, Mental Health - Bipolar Disorder.

In addition to having two or more of the listed chronic conditions, member must also meet the following:

- Member has filled six or more Part D prescriptions for chronic medications in 30 days, and
- Member is projected to exceed annual prescription medication costs of \$3,000. Medication cost will be calculated based on previous quarter amount greater or equal to \$750.00.

Members will be automatically enrolled if they qualify and will be informed of their enrollment in this special program. Members will also have the opportunity to decline entirely if they so choose.
